

How to Install **Lightroom Profiles**

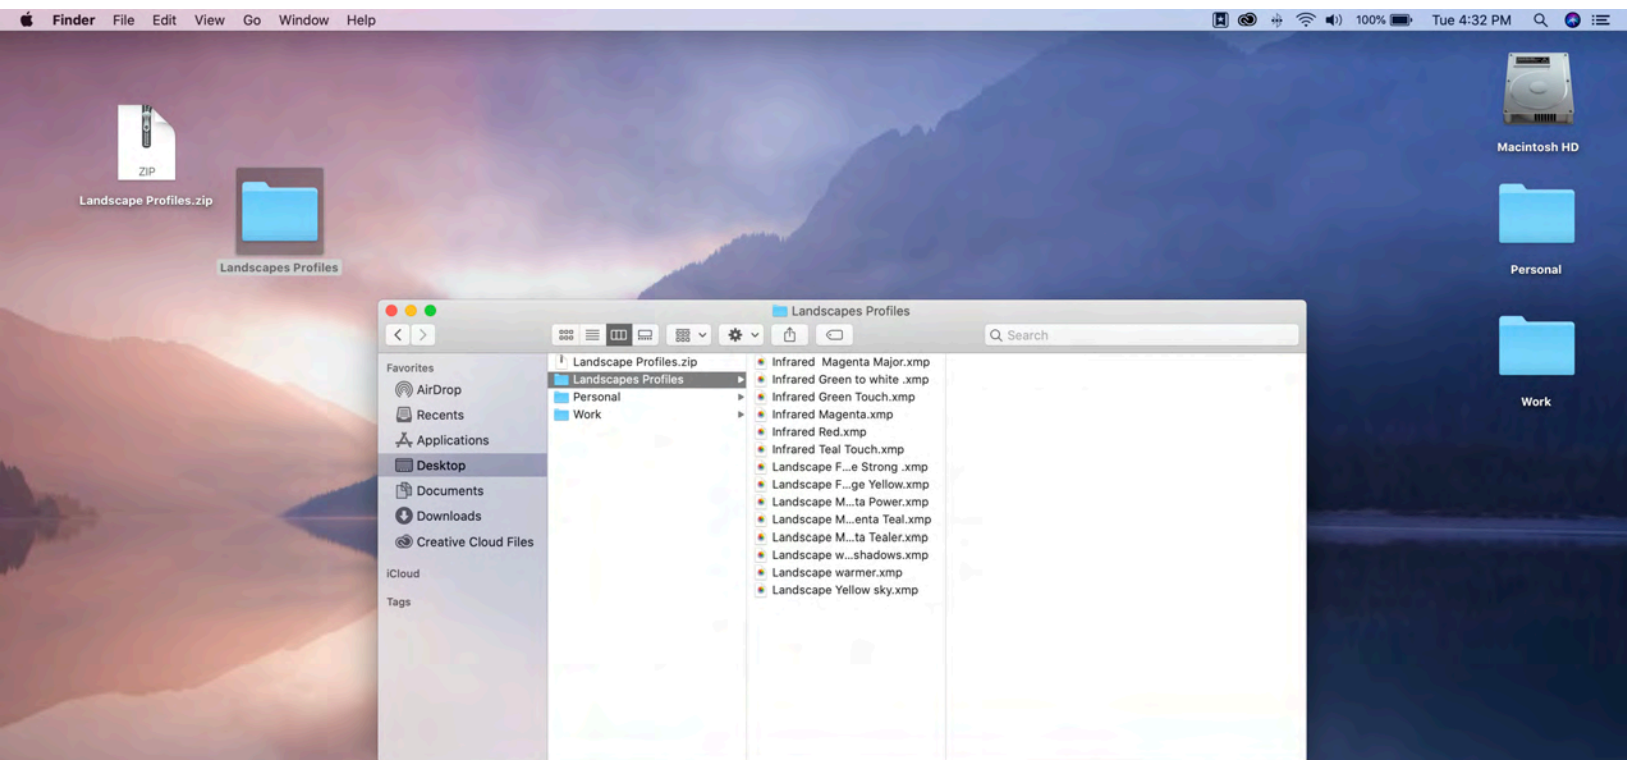

Lightroom Classic

versions 7.3 & 7.4

1. Prepare your profiles folder

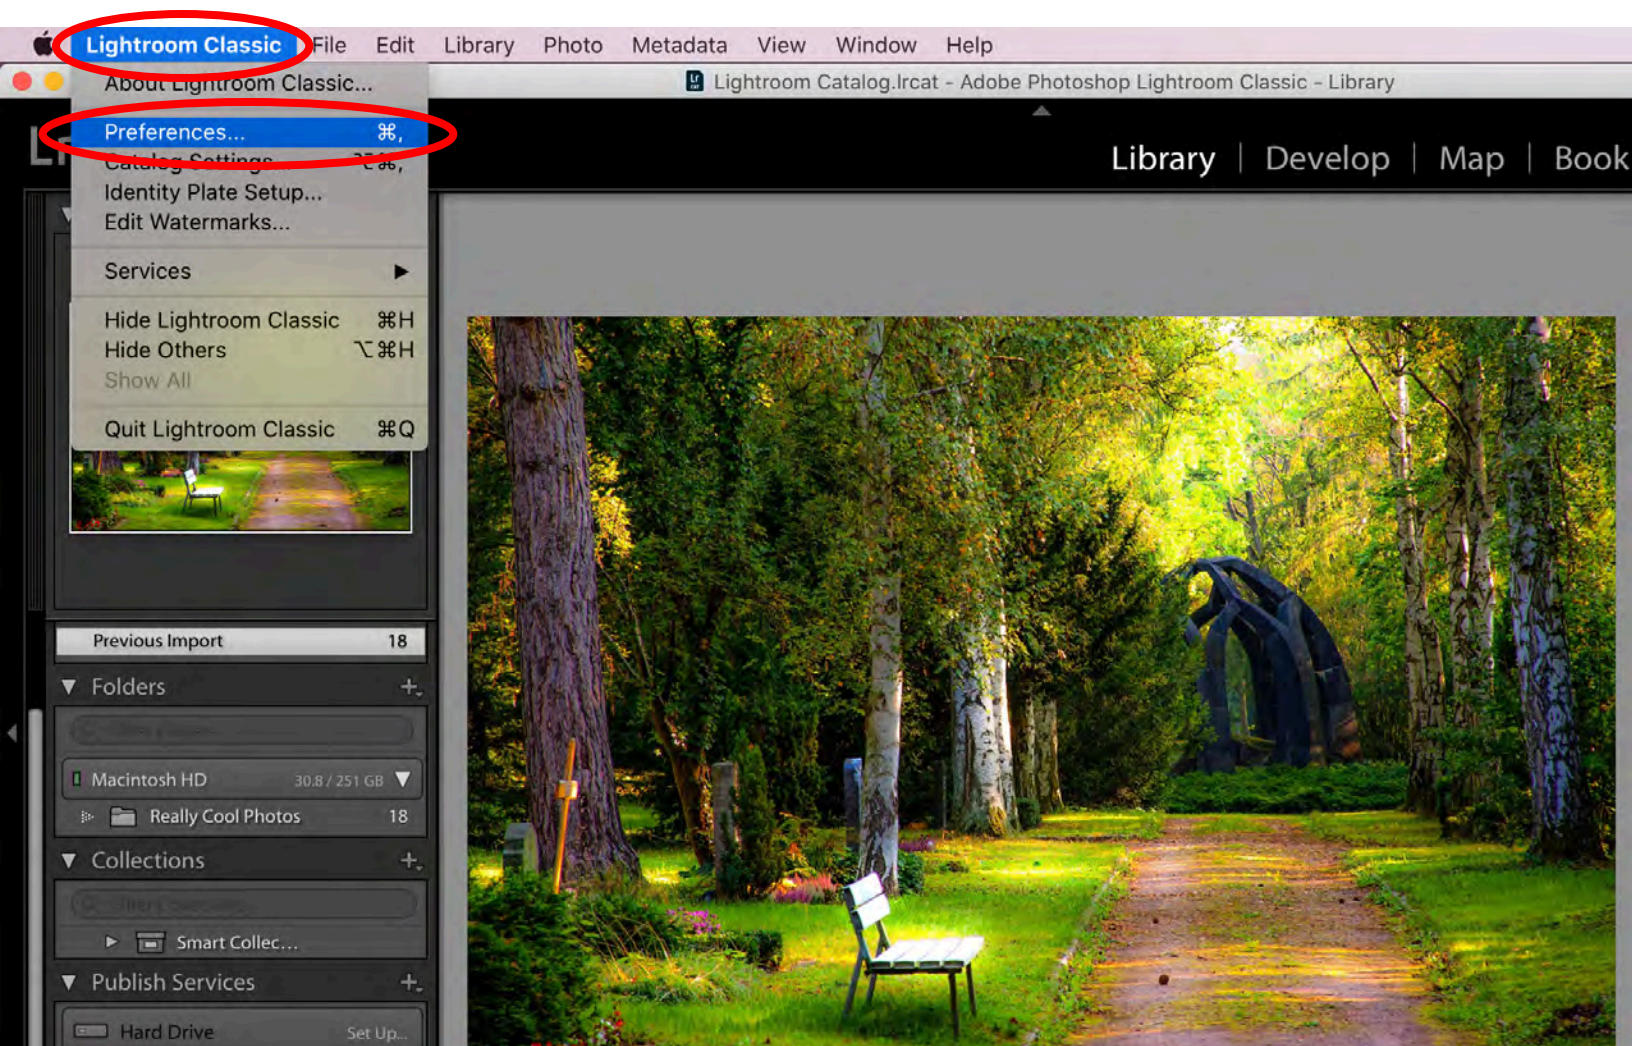

Download and unzip your profiles folder.

2. Go to Lightroom Preferences

Launch Lightroom as your normally would and open an image.

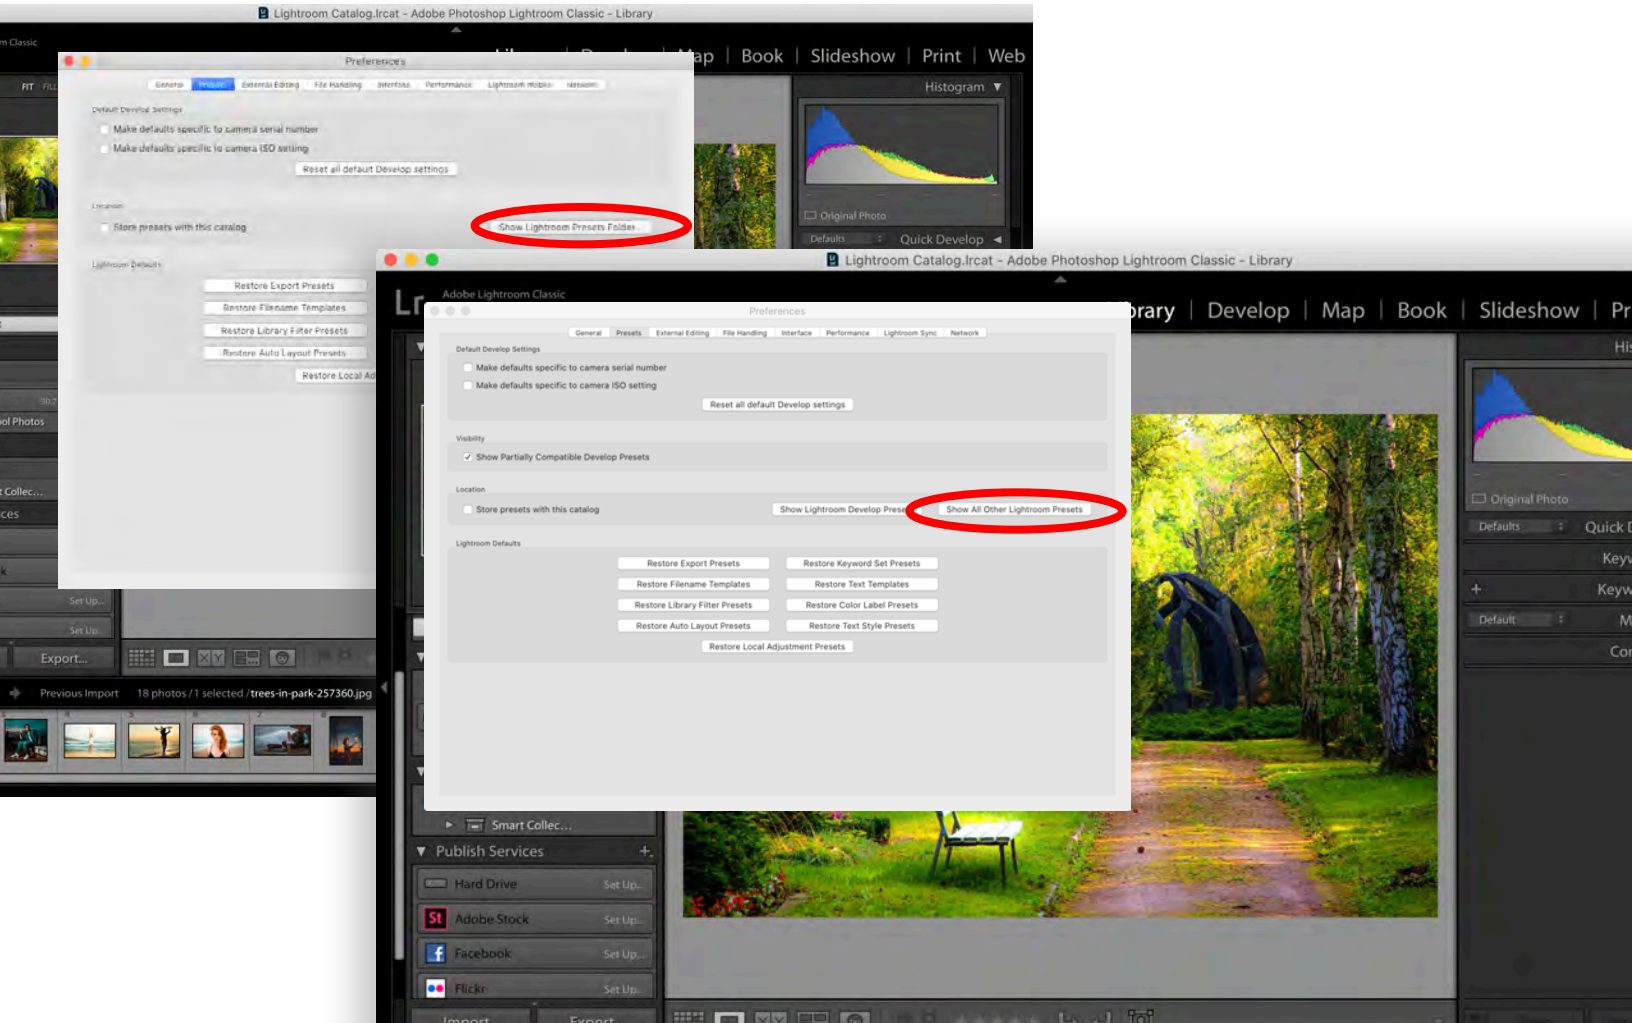

From the top menu bar, click Lightroom Classic and select **Preferences**.

3. Access Presets and Profiles

From the Preferences window, select the second tab, **Presets**.

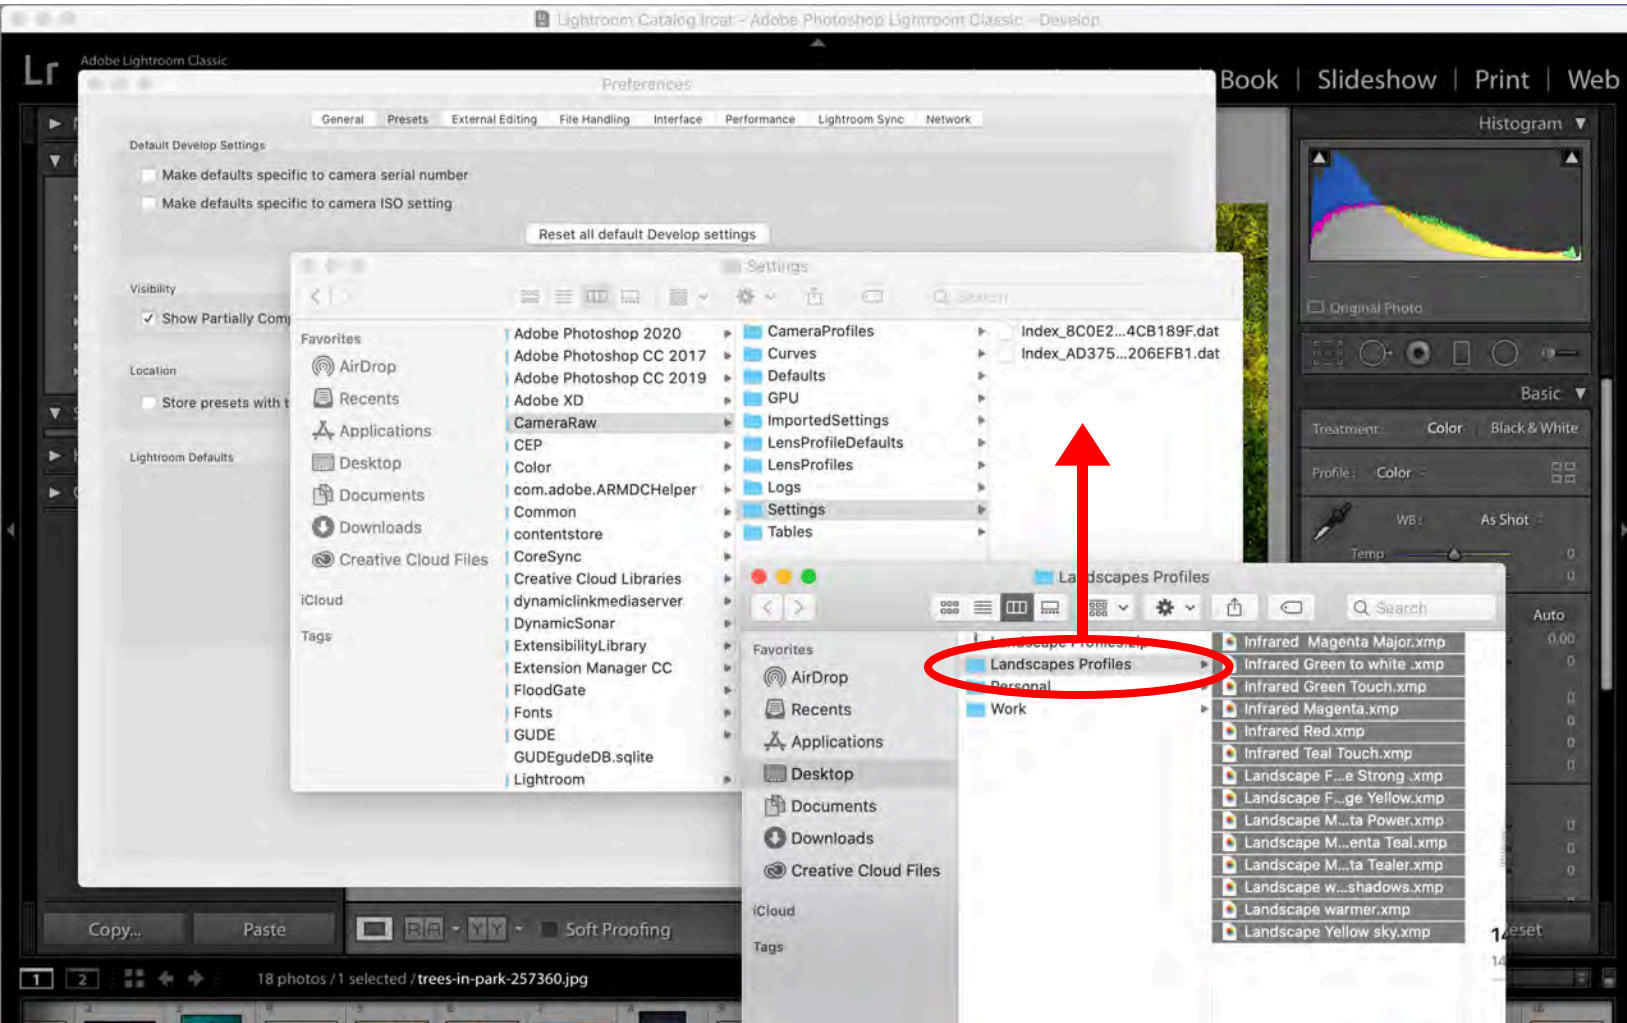

Depending on your version, click either the **Show All Other Lightroom Presets** or **Show Lightroom Presets Folder**

4. Copy over Profiles

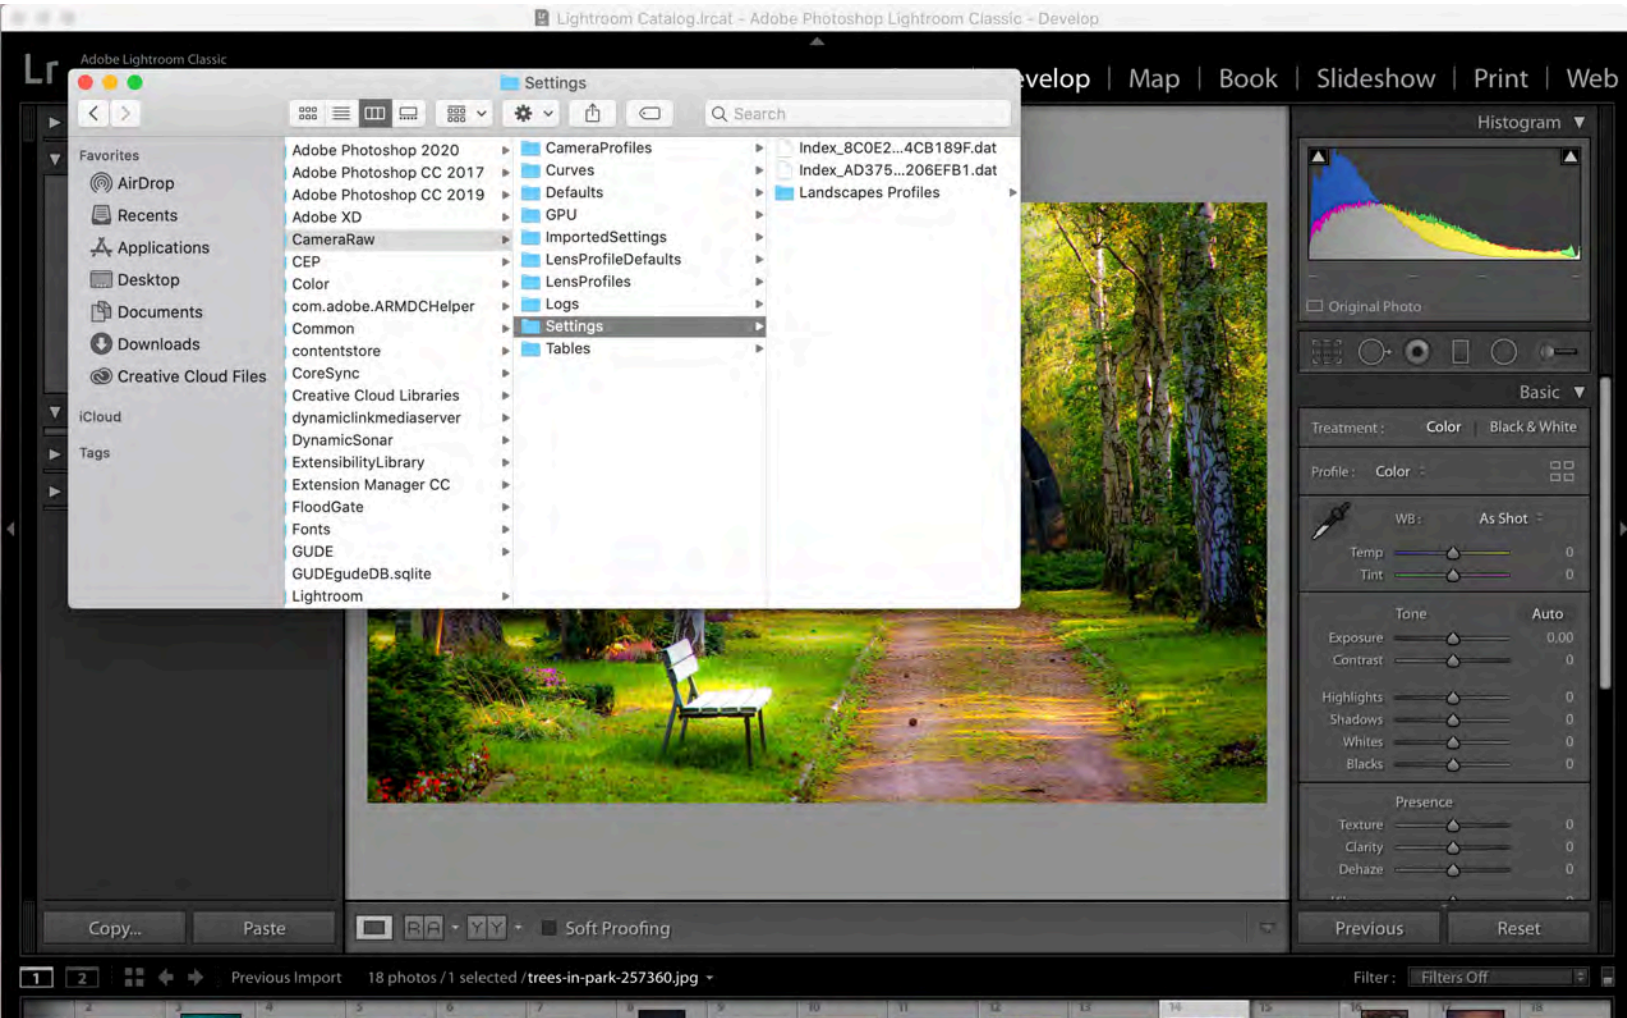

Find and open the **Camera Raw** folder
open the **Settings** folder.

Drag over or copy and paste your unzipped
Profiles folder over to the Settings folder.

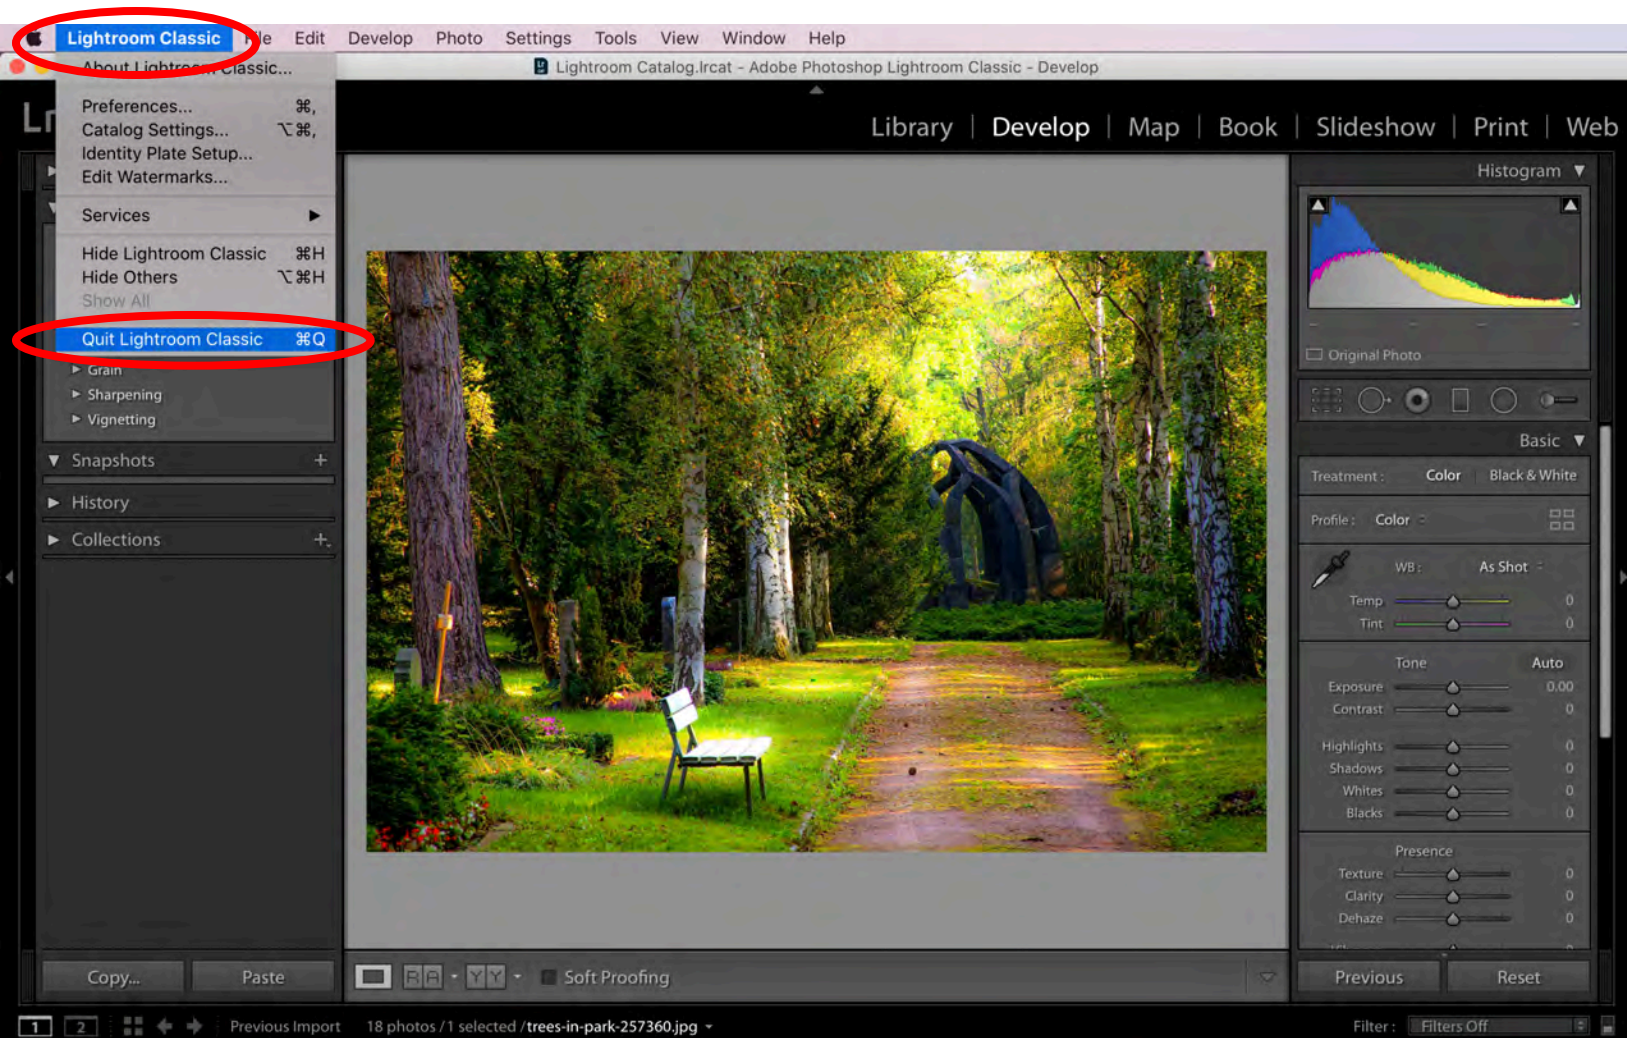

5. Your Profiles are copied

Your Profiles should now be in the Camera Raw folder under Settings.

6. Close Lightroom

From the top menu bar, click **Lightroom Classic** and select **Quit Lightroom Classic**.

7. Re-Launch Lightroom

Launch Lightroom Classic as you normally would and open an image.

8. Go to your Profiles

From the submenu, click **Develop**.

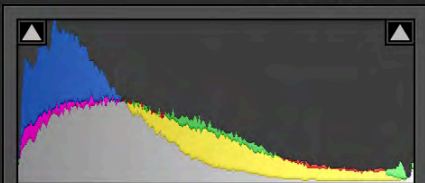

Under the **Basic** dropdown menu, click the **Profile** dropdown menu and select **Browse**.
